## PROFESSIONAL SUMMARY

Information Systems graduate with experience in web development and bilingual technical support. Background in C#/.NET development for the financial sector, freelance software development, and technical support in corporate environments. Experience with API integration, databases, and AI-powered applications, including large language model (LLM) integration, speech synthesis, and voice cloning. Recent projects use Python, React, and Node.js and include a local voice generation application, an AI-powered Firefox extension, and an election results dashboard. Fluent in English.

## TECHNICAL SKILLS

- **Back-end:** C#, .NET, ASP.NET MVC/Core, Web API, Python, FastAPI, Node.js, and Express.
- **Front-end:** JavaScript, TypeScript, React, HTML5, CSS3, Bootstrap, and AngularJS.
- **Artificial intelligence and LLMs:** model integration through APIs, Gemini API, prompt design, context preparation, and structured response handling.
- **AI for audio:** text-to-speech (TTS), voice cloning with OmniVoice, local model inference, and audio processing with FFmpeg.
- **AI-assisted development:** AI tools for implementation, code review, troubleshooting, and test creation.
- **Databases:** SQL Server, SQLite, and MongoDB.
- **Data access:** Entity Framework Core, SQLAlchemy, and Prisma.
- **Tools and practices:** Git, GitHub, REST APIs, automated testing, and CI/CD with GitHub Actions.
- **Technical support:** Windows, remote support, Active Directory, ServiceNow, BMC Remedy, and basic SAP knowledge.
- **Software fundamentals:** object-oriented programming, MVC, dependency injection, and foundational knowledge of SOLID and DDD.

## PROFESSIONAL EXPERIENCE

### Freelance Full Stack Developer

**2014 - Present (Current)**

- Develop and maintain web applications across the front-end and back-end.
- Built a rewards program using Node.js and React, serving more than 2,500 users.
- Develop projects using C#/.NET, Python, JavaScript, React, and API integrations.
- Integrate AI into applications, including LLMs and voice generation.
- Provided programming and system maintenance services for Primecomm.
- Recent projects include PacTTSClone, PacMonkey, and ElectionTracker26.

### Wipro - Systems Analyst II

**November 2021 - March 2023 | Remote**

- Developed and maintained Itaú's mortgage lending portal as part of an eight-person team.
- Implemented features and API integrations using C#, .NET, ASP.NET MVC, and Web API.
- Developed user interfaces with HTML5, JavaScript, and Bootstrap 4.
- Collaborated with the team to investigate and resolve application issues.

### CGI Group - Bilingual Service Desk Analyst

**2014 - 2016 | Mogi das Cruzes, São Paulo, Brazil**

- Provided technical support in Portuguese and English by phone, chat, email, and service portal.
- Diagnosed and resolved Windows, application, and access issues, including through remote support.
- Installed and configured software and managed access permissions in Active Directory.
- Logged and tracked tickets using BMC Remedy and ServiceNow.
- Provided basic SAP support and collaborated with technical teams on incident resolution.

## RECENT PROJECTS

### PacTTSClone - Local Speech Synthesis and Voice Cloning Application

**2026 | Python, OmniVoice, FFmpeg, and GitHub Actions**

https://github.com/RicardoMalosso/PacTTSClone

- Develop an application that generates speech from text and voice samples using local processing.
- Integrate the OmniVoice model for speech synthesis and voice cloning.
- Implement voice management, audio playback, generation history, and processing progress tracking.
- Work on application packaging, a Windows installer, automated testing, and continuous integration.
- Develop features for Twitch integration and remote application access.

### ElectionTracker26 - Election Results Dashboard

**2026 | JSON APIs, Caching, and Data Visualization**

https://github.com/RicardoMalosso/ElectionTracker26

- Developed a dashboard displaying national results and results for all 26 Brazilian states and the Federal District using official TSE data.
- Implemented shared caching to reduce requests to the data source.
- Used adaptive polling based on vote-counting progress and the frequency of result changes.
- Built result progression visualizations and an overlay interface for OBS broadcasts.

### PacMonkey - AI-Powered Firefox Extension

**2026 | JavaScript, Gemini API, LLMs, and DOM Manipulation**

https://github.com/RicardoMalosso/PacMonkey

- Develop an extension that customizes web pages through natural language commands.
- Integrate the Gemini API and prepare DOM context to guide requested changes.
- Implement a chat sidebar, element selection, and previews for users to confirm changes.
- Manage customizations by page or domain and reapply them after page reloads.
- Process the context sent to the model to limit exposure of page content.

### Web Portfolio with Admin Panel

**2026 | React, Vite, Node.js, Prisma, and SQLite**

- Developed a portfolio with Portuguese and English versions.
- Built an admin panel with Google authentication and API documentation using Swagger.

## EDUCATION

**Bachelor's Degree in Information Systems**

Universidade de Mogi das Cruzes (UMC)

2011 - 2015 | Completed

## LANGUAGES

- **Portuguese:** Native.
- **English:** Fluent, with professional experience providing bilingual technical support.
